Store Supply Warehouse Flexible Childrens Mannequin

70-369 and 70-370

Your Flexible Childrens Mannequin from Store Supply Warehouse comes with a brushed aluminum neck cap and features an optional interchangeable head. Interchanging the neck cap and the head is as easy as 1-2-3!

1. The neck cap can be removed by simply unscrewing it.

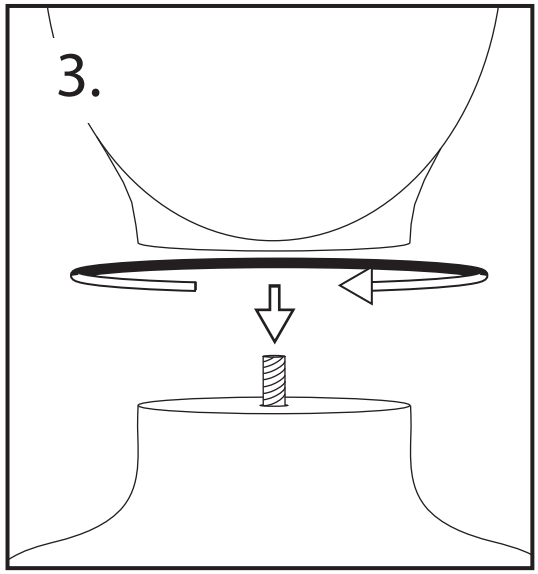

2. Once the neck cap is removed a threaded bolt will be exposed that extends about a quarter inch outside the top of the mannequin body. In order to accommodate the head piece this bolt must be unthreaded until it extends a half inch above the top surface of the mannequin.

3. Once the threaded bolt has been adjusted the head can be screwed into place.

In order to replace the neck cap the threaded bolt will need to be threaded back in to its previous level.
